SUMMARY

Solutions Architect and hands-on backend engineer with 14+ years building AI SaaS, fintech, insurance, and high-volume platforms. Owned the architecture for an LLM search visibility platform measuring brand citations across ChatGPT, Gemini and Perplexity, with multi-agent remediation generating 10K+ articles per month on Qdrant retrieval. Led backend architecture for a cashback platform with 1M+ customers, 5,000+ daily transactions, and PKR 2.5M+ daily purchase value at peak.

SELECTED WORK

Production LLM Search Visibility Platform

- Took an AI platform from prototype to a live business system in 11 weeks: a LangGraph-routed multi-agent system over Qdrant retrieval that removed 80% of manual workflow steps. Case study: [uzairkhatri.com](#)

Fintech Platform - 1M+ customers, 5,000+ transactions per day

- Owned backend architecture through a monolith-to-services migration, built the settlement and merchant integration layer behind partner payouts, and set the engineering standards adopted across four teams.

Regulated Insurance Document Workflows

- Replaced manual approval chains with traceable, audited service workflows across two insurers concurrently, inside a compliance-bound enterprise environment.

EXPERIENCE

AWESOME MOTIVE, INC. - US REMOTE WORDPRESS PRODUCT COMPANY | JULY 2026 - SEPTEMBER 2026

Contract Engineer - Sugar Calendar

- Shipped fixes and improvements to a commercial WordPress product, working issue-driven and fully async with a distributed US team.
- Built an AI-assisted pre-PR review gate in Claude Code that audits every change against the team engineering standards before a pull request is opened.

DISRUPT.COM - VENTURE STUDIO BUILDING AI-POWERED SAAS PRODUCTS (WELLOWS, SAVYOUR) | 2017 - JUNE 2026

Solutions Architect | 2024 - June 2026

Wellows - LLM search visibility platform measuring and improving brand citations in AI answers

- Owned the architecture for an LLM search visibility platform scoring and ranking brand citations across ChatGPT, Gemini, Perplexity and Google AI Overviews.
- Built the remediation layer that closes citation gaps through content generation at 10K+ articles a month and automated page issue fixes.
- Designed a LangGraph-routed multi-agent system of three production agents with isolated state and independent retry logic.
- Removed 80% of manual workflow steps through automated extraction and classification behind an LLM evaluator gate at 0.85 confidence.
- Ran OpenAI and Claude in production with AWS Bedrock failover when primary providers hit rate limits.
- Built the Qdrant retrieval layer to hold a 200ms vector retrieval SLA under production load.
- Cut API latency from 800ms to 120ms by profiling slow paths, queueing blocking work, and simplifying service calls.
- Rebuilt processing around AWS SQS with dead-letter isolation so failed jobs retried without blocking the pipeline.
- Built REST APIs and WebSocket status updates for real-time tracking of long-running content jobs.
- Wrote service contracts, RFCs, and runbooks for 5 microservices.

Solutions Architect | 2023 - 2024

Savayour - Cashback and rewards fintech platform with 1M+ customers

- Led backend architecture for a 1M+ customer platform across service ownership, data flows, and release planning.
- Built data transformation pipelines feeding BigQuery, turning platform transaction data into analytics used across product and operations.
- Split the monolith into 12 domain services; average feature delivery dropped from 3 weeks to 5 days.
- Designed settlement flows and merchant APIs used across 100+ partner integrations.
- Introduced ADRs and architecture reviews across 4 engineering teams.
- Implemented role-based access controls and audit logging so financial data changes could be traced during support and reconciliation.
- Reduced developer onboarding from 2 weeks to 10 days by cleaning up documentation, CI/CD standards, and team workflows.

Associate Architect - Savyour | 2021 - 2023

- Owned search and user-interaction services for Savyour's 1M+ customer platform, coordinating API changes with product and mobile teams.
- Improved search-driven engagement by 10% through ranking changes, Redis caching, and query-path tuning.

Senior Engineer to Lead Engineer - Savyour | 2017 - 2021

- Promoted from senior engineer to lead engineer while owning backend APIs for Savyour's core platform.
- Built Laravel and PHP services behind user actions, merchant integrations, and internal operations.
- Reduced recurring production issues by refactoring unstable backend paths and tightening code review standards.
- Led and mentored 10 engineers through code reviews, design discussions, debugging support, and delivery planning.

EFU LIFE INSURANCE AND TPL LIFE INSURANCE | 2021 - 2023

Enterprise Systems Consultant - Contract, Concurrent

- Built Java Spring Boot services and secure REST APIs for regulated insurance document workflows with audit requirements.
- Automated 5 IBM FileNet approval workflows by mapping manual approvals into traceable service steps, reducing turnaround from weeks to days.
- Removed backend bottlenecks in document routing by debugging integration failures and simplifying enterprise data exchange flows.

EARLIER EXPERIENCE | 2012 - 2017

Senior Software Developer - Hhelios Consultants, Axaact | Web Developer - Social Hubris

- Delivered 100+ web applications, CMS integrations, REST APIs, and backend services for enterprise and international clients.

TECHNICAL SKILLS

Languages and Frameworks

Python, FastAPI, Django REST Framework, Java, Spring Boot, PHP, Laravel, JavaScript, TypeScript, React

AI and LLM Systems

OpenAI APIs, Anthropic Claude, Google Gemini, LangChain, LangGraph, RAG, Qdrant, embeddings, vector search, prompt engineering, structured outputs, multi-agent orchestration, LlamaGuard content safety, LangSmith and Arize tracing, LLM evaluator gates, Model Context Protocol

Architecture and Backend Systems

high-concurrency systems, distributed systems, microservices, event-driven architecture, Domain-Driven Design, REST APIs, WebSockets, async processing, CQRS

Data, Cloud, and DevOps

PostgreSQL, MySQL, MongoDB, Redis, BigQuery, AWS ECS Fargate, Lambda, RDS, ElastiCache, SQS, API Gateway, CloudWatch, Docker, Jenkins, Terraform, GitHub Actions, CodePipeline

Security and Reliability

Role-based access control, PII encryption, audit logging, structured logging, monitoring, performance tuning, CI/CD, pytest, PHPUnit, Jest

CERTIFICATIONS

AI and Machine Learning

- Machine Learning with Python - IBM (2024)
- Claude 101 - Anthropic (2026)
- Claude Code in Action - Anthropic (2026)

Professional and Technical

- Laravel Certification - Laravel (2022)

EDUCATION

Bachelor of Computer Science

Newports Institute of Communications and Economics | 2012 - 2015

ACCP - Aptech Certified Computer Professional (3-Year Diploma)

Aptech Computer Education | 2011 - 2014
